🔗 Portfolio

👤 PROFILE

I am a Full-stack developer who likes creating complex end-to-end applications using different languages and tools. Till now I have worked on developing complex websites.

🎓 EDUCATION

Bachelor of Technology
Godavari Institute of Engineering and Technology
2019 – 2022 | Rajahmundry, India

📁 PROJECTS

Humanitarian Finance Forum
Humanitarian funding allocated to specific emergencies.ix. Government donors also have preferences for where they fund, based on range of strategic priorities. To develop this website, I used the Next.js framework, the React-form hook and drop zone libraries, and the CK editor library.

Ecommerce Website – FastKart
The FastKart is a web application that is used for purchasing products online. It was developed using Next.js with Sass and VS code. Also used libraries like React slick and React-Form hook. It was compatible with smartphones, tablets, and Laptop and Computers , related it the company's Operations and industry trends.

🧠 SKILLS

Java ∣ SpringBoot ∣ HTML ∣ CSS ∣
Javascript ∣ SQL ∣ React.js ∣ Next.js ∣
Hibernate ∣ Git

🎸 INTERESTS

Listening to Music ∣ Programming ∣
Watching Movies

💼 PROFESSIONAL EXPERIENCE

Amazon
ML Data Associate I
03/2024 – present | Hyderabad, india

- Built and tested an AI Assistant, improving efficiency by **20%** and delivering reports on time.
- Resolved project risks, reducing delays and ensuring smooth execution.
- Improved system accuracy through data annotation and testing, minimizing downtime.
- Migrated changes to production, reducing post-implementation issues.
- Managed relationships with high-profile clients like Amazon, ensuring satisfaction.
- Collaborated with onshore/offshore teams to solve technical issues, ensuring timely launches.
- Met deadlines and quality standards, increasing on-time completions by **10%**.
- Developed an AI Assistant for **Olympus MIL**, integrating data interpretation and emotional analysis.
- Standardized AI Assistant configuration, saving **324 hours annually**.
- Improved efficiency by **13%** by addressing AI limitations and emotional handling.
- Standardized processes, increasing consistency and reliability by **12%**.
- Led a transformative project, improving productivity and performance.

Picktime
Java Developer Intern
11/2023 – 02/2024 | Hyderabad, india

- Developed and maintained Java code using **Spring Framework** and **MVC design patterns**.
- Maintained and optimized existing applications for performance.
- Introduced **GIT** for version control, improving team workflow.
- Supported team members and promoted collaboration for system reliability.

CraftNotion
Frontend Developer Intern
04/2023 – 07/2023 | Hyderabad, India

- Proficient in developing and maintaining responsive web pages using **HTML, CSS, JavaScript, React.js, and Next.js**.
- Collaborated with senior developers to implement industry best practices for building responsive and well-structured websites.
- Used **React.js** and libraries like **react-form-hook** for efficient form data management.
- Integrated **React-slick-slider** and **Framer Motion** to create visually appealing animations and enhance user experience.
